

METHAGENE

Large scale methane measurements on individual ruminants for genetic evaluations

WHAT IS METHAGENE?

METHAGENE is a COST Action that focusses on:

- Protocols to harmonize large-scale measurements with different techniques,
- Easy to record and inexpensive proxies to be used for genetic evaluations,
- Approaches to incorporate methane emissions into breeding strategies

INFO FINAL MEETING

The final meeting of METHAGENE will be:

- On: October 11-13, 2017
- In: Caserta, Italy

Deadline for registration:

- September 15, 2017
<http://www.mamabuffalowst.org/portal/en/methagene-final-meeting-in-caserta-italy-11-13-october-2017/>

WHAT IS THE PROGRAM?

The programme will be mixture of:

- Invited speakers providing a broad overview
 - Jude Capper, Tim Byrne
- Working Group leaders presenting achieved results
- Early stage researchers given the floor to share their work
- Reflections of industry
